NEBULO
Cold Fogger

NEBULO Mod. "Europa" is the result of field experience and thorough research carried out by Copyr in order to offer its customers equipment manufactured using leading-edge technologies.
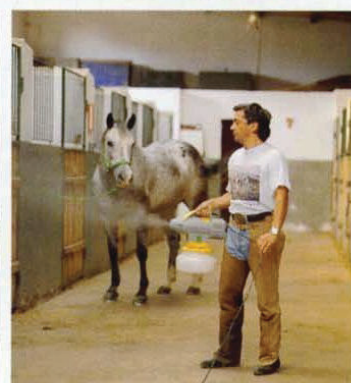

NEBULO Europa's main characteristics are:
- thermoplastic structure, resistant to impacts and chemical agents
- powerful electric motor
- innovative flow control system.

Thanks to a special needle adjustment system, by which the amount of liquid being atomized is constantly known, the flow control delivers 15 to 200cc/minute, according to liquid viscosity.

Thanks to its special atomizing characteristics ensured by a nozzle/diffuser system (under medium flow regulation, the diameter of 70% of the drops produced averages 5 to 10 microns), NEBULO "Europa" enables better, rational spray of the atomized product. This is the ideal device for all places requiring disinfestation, disinfection or deodorizing, such as hotels, camping sites, food storage, company canteens, hospitals, glasshouses, stock rearing, etc.

NEBULO "Europa" has been approved by IMQ, the Italian Quality Mark Institute, conforms to EC Directives 89/336 and 93/68 and carries the $C\epsilon$ Mark.

SPECIFICATIONS

Motor	Electric, 220 V 50/60 Hz (115 V - 240 V on request)
Power	700 W
Net Weight	3 Kg
Tank	4 Liters
Dimensions	40 cm H x 35 cm L, Tank Ø 25 cm.

Copyr products suitable for NEBULO

KENYATOX
Ready-to-use liquid insecticide with natural pyrethrum base; designed for use in the food industry.

PIRETRO SAFE H
Ready-to-use liquid insecticide with natural pyrethrum base; emulsified in water.

PERTRIN L
Ready-to-use residual liquid insecticide with permethrin and natural pyrethrum.

PLURISAN
Concentrated deodorising liquid germicide with quaternary ammonium salts base; cleans and disinfects.

KENYAFOG
Ready-to-use liquid insecticide with natural pyrethrum base; designed for use in stables and farms.

SANIPOL
Concentrated liquid germicide for cleaning and disinfecting animal and poultry farms.
